MEMORANDUM FOR: Director of Communications

SUBJECT : Special Archive of AQUATONE Cables

1. It would seem highly desirable from a Project security and expediency standpoint to maintain a Project Cable Archive.

2. I recognize that this proposal is unique in Agency procedure, but propose that favorable consideration be given to my recommendation that a record be maintained on a day-to-day basis, in addition to the ultimate repository responsibility in accordance with existing Agency regulations.

3. If such an arrangement is possible, I would appreciate it if action were taken to implement the process.
